An expressive piece of jewellery with a modern character: this ring in rose gold 750 and carbon is made in our workshop with great care. The combination of warm rose gold and striking carbon gives the ring a contemporary, individual look.

At its centre is an impressive faceted tsavorite of 2.67 ct. The vivid green gemstone is securely held in an elegant four-claw setting and forms a fascinating contrast to the dark carbon.

A special piece for all who appreciate strong colours, high-quality materials and handcrafted workmanship.
